

PRESS RELEASE

CAR REFINISHES

Product Release: Sikkens Autowave®

Sikkens Autowave® is the ultimate waterborne basecoat. With Autowave®, solvent emissions can be reduced by more than 85%, making it less harmful to the environment. Autowave® can be sprayed over all Sikkens fillers or primers. The system has been proven to have excellent color accuracy, easy application, good covering power and it's cost effective. With Autowave, customers can switch to a waterborne system without compromising quality.

Note to Editor

Car Refinishes is one of the world's leading suppliers of paints and services for the car repair, commercial vehicles and automotive plastics markets. It sells coatings for car body refinishing, or recoating, to customers including bodyshops, distributors, fleet owners, automotive suppliers and major bus and truck producers. Brands include Sikkens®, Lesonal®, Dynacoat®, Wanda®, and Autocoat® BT. Operating in more than 60 countries, Car Refinishes has specialists around the world who understand local markets and can serve local needs. Its state-of-the-art customer services, color and technology solutions include offering technical and logistical support and the delivery of training programs.
